Inspector's remark

1. Product Description - The product name on the client PO sheet does not match the product name on the inner pack - (Factory provided client approved mail, there is subject only mentioned January delivery concern, accordingly mentioned NOT OK)

2. Outer Packing: Assortment, Dims & Weight Result – NOT OK - Factory did not meet the client required carton dimensions found during the inspection 70 cm x 33 cm x 47 cm (L x H x W) - (The factory provided a mail regarding the above dimension issue, stating that new dimensions are being followed. However, there is no clarification of client approval for the revised dimensions)

3. Inner Packing – NOT OK - Incorrect color sequence was found. Incorrect folding direction was observed; garments were inserted into the inner box in the wrong orientation

4. Unit Packing – NOT OK - Incorrect color sequence was found. Incorrect folding direction was observed; garments were inserted into the inner box in the wrong orientation

5. Item Packaging – NOT OK - Incorrect color sequence was found. Incorrect folding direction was observed; garments were inserted into the inner box in the wrong orientation

6. The PP sample indicates two SKUs under the same PP sample. The factory also provided an internal email confirming that both SKUs follow the same PP sample

7. Factory offered quantity 3470 pcs against booked quantity 4000 pcs.

• Shortage qty - 530 pcs

• Percentage - 86.75%

• Total cartons - 36

• Selected cartons – 15

8. PP Sample approved by MDS

9. Trim card / shade bands approved by internally

From: QIMA Inspections

298 pictures/videos

See below

- 10. All the documents, samples, and trim cards provided by the factory were checked, and the inspection was done accordingly
- 11. Carton Packing and Specification General – N/A – Carton mark and numbers not completed during the inspection
- 12. Carton Packing and Labelling – N/A – Carton mark and numbers not completed during the inspection
- 13. Carton Labelling & Identification Requirements – N/A – Carton mark and numbers not completed during the inspections
- 14. The factory did not repack the inspected garments in front of the QIMA inspector due to time constraints and a shortage of manpower required for the hand-to-hand packing process. As the supplier needed extra time to complete the repacking, no observations could be made by the QIMA inspector regarding the repackaging of the inspected garments

Result

Pass

Needle damage check

8 Pcs

Pass 3

1. Check that there is no obvious damage from needles from construction.
 2. Pull the seams by hand using force for 10s to inspect the needle holes for defects
- PASSED

Model fitting check

1 Pcs

N/A

1. Use the product on a model, doll or dummy.
2. Assess general fitting, back pocket alignment, side pocket alignment, seams, waistband, etc.
3. If there is an approved sample, verify that the inter-compatibility between the approved sample and the tested products.

Client approved dummy or model not available in the factory during the inspection

Fabric weight test

5 Pcs

N/A

1. Put the fabric flat and use the calicrated GSM cutter to cut it to standardized size (100cm²).
2. Weight the specimens on the calicrated weight scale.
3. Use the average weight to compare to specifications.

Client approved dummy or model not available in the factory during the inspection

Hanger check

200 Pcs

N/A

1. Check that the product includes a hanger.
2. Check that the hanger matches the specifications.

Not related this product

Information check 200 Pcs - N/A	1. Check that the importer / exporter / distributor information is attached correctly to the product (label, marking, printing); 2. Check that the information is correct as per the specifications. Client approved dummy or model not available in the factory during the inspection
Fatigue test 8 Pcs - N/A	Repeatedly use the product and its adjustable parts to the full extent of their capacity for 20 cycles with the force by hand, or following the client specifications if there is any. Not related to this product
Rubbing (textile) test 5 Pcs ✓ Pass 3	Use a proper rubbing cloth (do not use a random fabric). If needed ask factory to provide rubbing cloth from their testing lab. 1. Rub the product or label with a dry white cotton cloth ten times over a 10cm distance. 2. Rub the product or a label with a white cotton cloth soaked with water ten times over a 10cm distance. 3. Rub the product or a label with white cotton cloth soaked with petroleum spirit ten times over a 10cm distance. (follow client specification). 4. Ensure to perform the test on each external color and fabric. PASSED
Seam strength test 200 Pcs ✓ Pass 3	Pull the product by hand at the seam location (side seam, waist band seam, inseam, belt loops etc) for 10 seconds to test the strength of the seam and check for fabric. PASSED
Elastic waistband stretched length 5 Pcs ✓ Pass 3	For each size: - Stretch the elastic waistband and compare the stretched length to the specifications; PASSED
Assortment / parts check 8 Pcs - N/A	Check that there are no missing or wrong parts, tools, accessories or instruction manual. Record the detail of the assortment (product, accessories, tools and manuals). Not related to this product
Adhesive test 8 Pcs ✓ Pass 12	1. To make sure the surface is clean before the test. 2. Use a strip of pressure-sensitive tape (3M 500 for instance) and apply it firmly on the whole area to be tested: artwork, logo, marking or the area specified by the client; 3. Press it by hand on the surface so that the tape is properly stuck, with no bubble or wrinkle; 4. Remove the tape in 0.5-1s with an angle close to 60 degrees, rapidly but not jerked. 5. Repeat this operation 3 times in the same area, the used tape should be cut off. PASSED
Color shading check 200 Pcs ✓ Pass 6	1. Assess the product color and shade under light box (2pcs per color, D65 light unless specified different by client) 2. Put the inspected pieces next to each other; 3. Identify any deviation in color from one sample to the other; 4. Check the color shading against the approved sample or production approved sample. PASSED
Barcode/QR code scanning test 5 Pcs ✓ Pass 5	1. Use scanner or phone APP and scan barcode. 2. Scan any barcode on the product and compare the results to the code under the barcodes (if any) and to the specifications. PASSED
Approval sample comparison 200 Pcs ✓ Pass 2	Check the dimensions, shape, style or color of the product against the approval sample. PASSED

Stitch density check

5 Pcs
 Pass 3

Count the number of stitches per inch compared to specifications or approval sample.
PASSED

Symmetry check

32 Pcs
 Pass 3

1. Lay the garment flat and button or zip it fully.
2. Visually inspect both sides for overall balance.
3. Use a measuring tape to compare distances from the center line to key points: pocket positions, sleeve lengths, collar tips, side seams, and hem lengths.
4. Ensure pockets and decorative features are level and equally spaced.
5. For accuracy, fold the garment in half and check alignment of sleeves, pockets, hems, and side seams.
6. Record any discrepancies outside the allowed tolerance and mark for correction. (Follow tolerance +/- 2 mm if no specified)
PASSED

Label check

200 Pcs
 Pass 26

1. Check that the specified labels are found attached to the product.
2. Check that the information of the label is correct to specifications.
PASSED

Metal / needle detection check

200 Pcs
 Pass 18

1. Check the workflow of pieces around the metal detection machine;
2. Check the calibration of the metal detection machine;
3. Scan the whole sampling size with the machine.
PASSED

Issued by QIMA Inspection (Shenzhen) Limited
Reviewed by Joseph Wang

THE ABOVE RESULT(S) REFLECT(S) QIMA LIMITED'S FINDINGS AT THE TIME AND PLACE OF INSPECTION. THIS REPORT DOES NOT RELEASE THE BUYER OR SELLER FROM CONTRACTUAL RESPONSIBILITIES, NOR DOES IT PREJUDICE THE BUYER'S RIGHT OF CLAIM TOWARD THE SELLER/SUPPLIER FOR COMPENSATION FOR ANY APPARENT AND/OR HIDDEN DEFECTS NOT DETECTED DURING INSPECTION OR OCCURRING ANYTIME THEREAFTER.

Joseph Wang
